

WORK EXPERIENCE

Tech Intern • Internship

Jun 2026 - Present

Venturex, Gurgaon

Frontend Developer Intern | Ticket Management System

- Currently collaborating with a team to develop a web-based Ticket Management System for complaint and support request management.
- Designing and implementing responsive, user-friendly interfaces using HTML, CSS, JavaScript, and React.js.
- Developing features such as ticket creation, ticket tracking, status updates, and interactive dashboards.
- Integrating frontend components with backend APIs to ensure seamless functionality and real-time updates.
- Enhancing user experience through animations, modern UI design, and performance optimization.
- Participating in project planning, testing, debugging, and Agile development workflows.
- Using Git and GitHub for version control and team collaboration.

Technologies: React.js, JavaScript, HTML, CSS, Git, GitHub, API Integration, UI/UX Design

EDUCATION

B.Tech, Computer Science

2024 - 2028

BML Munjal University

CGPA: 7.32/10

Senior Secondary (XII), CBSE

2023

Science

Kamla Nehru Bal Shiksha Sansthan,, Sultanpur

Percentage: 73.40%

Secondary (X), CBSE

2021

Kamla Nehru Bal Shiksha Sansthan,, Sultanpur

Percentage: 82.20%

TRAININGS / CERTIFICATIONS

DSA Trainee - Supreme Batch

Sep 2023 - Dec 2023

Jan 2026 - Present

CodeHelp, Virtual

C Programming

LOGICS AND NETWORK INSTITUTE OF TECHNOLOGY,

Sultanpur

PORTFOLIO

PROJECTS

**Full-Stack Web Engineer | Nirmaan Public School
(Freelance Client) ↗**

Jun 2026 - Jul 2026

Engineered a custom NLP Chatbot: Built a zero-dependency, client-side search engine in TypeScript utilizing Levenshtein distance, fuzzy matching, and synonym expansion to resolve queries without external LLM API costs. Optimized Core Web Vitals: Slashed a 15.5s Total Blocking Time (TBT) and 47s Largest Contentful Paint (LCP) by architecting a delayed hydration "bait-and-switch" pattern for heavy 3D WebGL assets. Built Resilient Backend Architecture: Developed a dual-failover email pipeline (SMTP to Resend API) and injected custom Express middleware to enforce strict SEO crawl control (X-Robots-Tag). Dominated Technical SEO: Implemented dynamic JSON-LD schema injection (FAQ, LocalBusiness, WebSite) synced directly to the knowledge base, successfully generating Google Rich Results.

Model For Predicting Price of Used Cars ↗

Aug 2025 - Dec 2025

Built a Python-based data analysis system to evaluate car resale prices using preprocessing, ANOVA testing, and K-Means clustering for market segmentation.

Gig Connect-Location Based Gig Platform ↗

Aug 2025 - Present

Designed and developed a location-based gig platform connecting gig workers and employers based on location, skills, and availability, enabling faster and more transparent job matching.

Coding Arena - Coding Practice Android App ↗

Jan 2026 - Jul 2026

Coding Arena is an Android coding-practice app built around a competitive learning experience. It includes authentication, profile management, a Striver A2Z problem sheet, leaderboards, arena-style coding battles, and an in-app code compiler for solving questions.

Parkymint-Smart Parking System

Jan 2025 - May 2025

Implemented an automated parking system integrating RFID access, OTP booking, and live occupancy tracking for efficient space management.

SKILLS

- | | | |
|-------------------------------------|---------------------------|-----------|
| • Figma | • MySQL | • CSS |
| • HTML | • JavaScript | • Node.js |
| • React | • Artificial intelligence | • Python |
| • C Programming | • Java | • SQL |
| • Express.js | • EJS | • Pandas |
| • NumPy | • Matplotlib | • Seaborn |
| • Canva | • Jupyter Notebook | • VS Code |
| • Object Oriented Programming (OOP) | • Data Structures | |

ADDITIONAL DETAILS

- Currently undergoing structured DSA training to strengthen coding and analytical skills.
- Coursera Certified - Work with Components in Figma.
- Earned Grade 'A' in C Programming certification from LNIT.
